

## InvestoReady

### Motivation

In recent times, investing is as important as earning. Financial literacy can allow a person to reach different level of heights. Investing is considered to be a risky task (particularly in stocks) because of which many people avoid it. Hence to make investing easy we are proposing this idea.

### Introduction

We have come with an Android app that will display various stocks and their analyzed data (percentage returns , company's performance graph, current stock price, etc). This app is mainly for beginners. The user can see the details of top 15 stocks which have been handpicked by team of experts. The app also allows you to automatically generate a portfolio and also provides Return of Investment Calculator (ROI).

### Features

1. AI powered portfolio
2. Return of Investment Calculator (ROI)
3. User friendly interface.
4. Beginner friendly
